Glutathione is a tripeptide, composed of glutamic acid, cysteine, and glycine that plays a vital role in supporting cellular function.

Anti-Oxidant Properties:

Glutathione serves as the major anti-oxidant that protects cells from free radical exposure. It plays an important role in scavenging reactive oxygen and recycling other anti-oxidants (Vitamins C & E).

Detoxification:

Glutathione is produced primarily in the liver and may help to support healthy liver function. Glutathione conjugates with heavy metals and toxins helping the body to eliminate these harmful substances.

Immune Support:

Glutathione may help to enhance the body's immune response by reducing oxidation which may help to improve immune cell health and the body's ability to fight disease.

Prevention of Skin Pigmentation:

Glutathione inhibits the activity of tyrosinase and production of melanin which helps to prevent peroxy lipid generation by scavenging reactive oxygen.

Applications:

- Dietary Supplements
- Functional Foods & Beverages
- Dietary Supplements
- Cosmetics

Key Benefits:

- Non-GMO
- Vegetarian
- Kosher & Halal Certified

Regulatory Status:

Glutathione is GRAS (Generally Recognized As Safe) for use in food and beverages.
